

## Internship Description: Full-Stack Developer

We are currently seeking a proactive and eager-to-learn Full-Stack Developer Intern with an interest in Software development, Infrastructure as Code, Systems Administration, DevOps, and Cybersecurity. This role offers an excellent opportunity to gain hands-on experience in Full-Stack development and infrastructure management. As a member of our small, friendly, and dynamic team of young professionals, you will have the chance to contribute to all aspects of real projects, learn from experienced professionals, and explore the latest industry practices and technologies.

### Responsibilities:

- Assist in the design, development, and deployment of Full-Stack services and APIs.
- Help implement infrastructure as code (IaC) practices, automating the provisioning and management of infrastructure.
- Collaborate with the team and its clients to understand the needs and requirements for new systems and infrastructure.
- Participate in maintaining and improving existing Full-Stack systems and infrastructure.
- Contribute to ensuring the scalability, performance, and reliability of Full-Stack systems and infrastructure.
- Participate in code reviews, contributing to maintaining high code quality and sharing knowledge.
- Learn to troubleshoot and resolve issues related to Full-Stack systems and infrastructure.
- Stay curious and up-to-date with the latest industry trends and technologies.

### Qualifications:

- Fluent French
- Basic knowledge of or interest in learning languages such as Python, or Node.js.
- Curiosity about cloud platforms like AWS, Google Cloud, and Azure.
- Willingness to learn about containerization and orchestration tools like Docker and Kubernetes.
- Strong problem-solving skills and attention to detail.
- Excellent communication and teamwork skills.

Our work environment is a small group of young and passionate people. As a Full-Stack Developer, you will have the opportunity to learn, grow, and contribute in a supportive and innovative environment.

If you are passionate about development, ready to learn, and eager to dive into Full-Stack Development using Pulumi, Terraform, Docker, Kubernetes and many other systems, this internship is made for you!
